 Inception date: 1 July 1998
 Class: A

Fund information on 31 August 2012

Fund currency: US\$¹
 Fund size: US\$231m
 Fund price: US\$162.94
 Number of share holdings: 61
 Dealing day: Weekly (Thursday)

Fund description

The Fund invests in a focused portfolio of companies with significant business interests in Africa, regardless of the location of the stock exchange listing. The Fund price is reported in US dollars but the underlying holdings are denominated in various currencies. Returns are likely to be volatile.

Fund objective and benchmark

The Fund aims to outperform African equity markets over the long term without taking on greater risk of loss. The Fund's benchmark is the MSCI Emerging and Frontier Markets (EFM) Africa Index (total returns).

How we aim to achieve the Fund's objective

We invest in shares that we believe offer superior fundamental value while taking into account risk and return. We research companies and assess their intrinsic value based on long-term fundamentals; we then invest in businesses where our assessment of intrinsic value exceeds the share price by a margin of safety. This approach allows us to identify shares that may be out of favour with the market because of poor near-term prospects, but offer good value over the long-term. The Fund's holdings will deviate meaningfully from those in the index both in terms of individual holdings and sector exposure.

Suitable for those investors who

- Seek exposure to African equities
- Are comfortable with stock market and currency fluctuations
- Are prepared to take the risk of capital loss
- Typically have an investment horizon of more than five years

The Fund is not available to South African residents.

Minimum investment amounts

Minimum initial investment: US\$50 000
 Minimum subsequent investment: US\$1 000

Annual management fee

The annual management fee ranges from 0.5% to 2.5% depending on the relative return of the Fund to the benchmark, before fees. The fee is calculated on a base of 1.5% plus one twenty-fifth of the cumulative three-year relative performance, subject to a floor of 0.5% and cap of 2.5%. For example if the cumulative three year performance of the fund is 20% and that of the benchmark is 15%, the fee rate is: $1.5\% + (20\% - 15\%) / 25 = 1.7\%$.

Performance in US\$ net of all fees and expenses

% Returns	Fund	Benchmark ²
<i>Unannualised:</i>		
Since inception	2157.7	464.6
<i>Annualised:</i>		
Since inception	24.6	13.0
Latest 10 years	25.4	20.1
Latest 5 years	6.7	4.2
Latest 3 years	12.7	13.0
Latest 1 year	-0.4	-0.7
Year-to-date (unannualised)	8.5	10.0
Risk measures (since inception)		
Maximum drawdown ³	-52.5	-60.5
Percentage positive months ⁴	60.0	59.4
Annualised monthly volatility ⁵	27.3	28.5

1. The Fund is currently priced in US dollars. Since inception to 30 April 2012 the Fund was priced in South African rands.
2. The current benchmark is the MSCI EFM Africa Index (total returns). Since inception to 30 April 2012 the benchmark was the FTSE/JSE Africa All Share Index including income. Performance as calculated by Allan Gray as at 31 August 2012 (Source: Bloomberg). Calculation based on the latest available data as supplied by third parties.
3. Maximum percentage decline over any period. The maximum drawdown occurred from October 2007 to February 2009 and maximum benchmark drawdown occurred from October 2007 to February 2009. Drawdown is calculated on the total return of the Fund/benchmark (i.e. including income).
4. The percentage of calendar months in which the Fund produced a positive monthly return since inception.
5. The standard deviation of the Fund's monthly return. This is a measure of how much an investment's return varies from its average over time.

Fund manager commentary as at 30 June 2012

3.7% of the Fund is invested in two platinum shares, Impala Platinum and Northam Platinum. Both these shares have performed poorly since the Fund acquired the holdings and to a much larger extent over the past one, three and five years.

South Africa's platinum industry is currently experiencing a very tough operating environment. Costs have increased well above inflation for the past 10 years while the prices of the various metals the mines produce have recently stagnated or fallen. The mines are also becoming deeper which necessitates ever increasing capital expenditure to maintain production. The result of these factors is a margin squeeze and both the high and mid-cost producers are making cash losses at current metal prices.

The South African platinum industry accounts for 75% of world mine supply. To our minds it is not a sustainable situation when the largest producing region is unable to generate positive cash flow, let alone its cost of capital. Supply is beginning to contract as high cost mines close and operating mines cut capital expenditure which leads to lower supply in time. The lower supply should lead to a tighter market and higher prices in the long run, benefitting the survivors. We believe Impala and Northam will be among the survivors as they are well positioned on the cost curve, have no debt and are well managed. On our estimate of normal metal prices both Impala and Northam are attractively priced.

Disclaimer

Shares are traded at ruling prices. The Fund may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. Allan Gray International Proprietary Limited, an authorised financial services provider, is the appointed investment manager of the Company. The Fund is incorporated and registered under the laws of Bermuda and is supervised by the Bermudan Monetary Authority. The Fund is also listed on, and regulated by, the Bermuda Stock Exchange. Neither MSCI nor any other party involved in or related to compiling, computing or creating the MSCI data makes any express or implied warranties or representations with respect to such data (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such data. Without limiting any of the foregoing, in no event shall MSCI, any of its affiliates or any third party involved in or related to compiling, computing or creating the data have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages. No further distribution or dissemination of the MSCI data is permitted without MSCI's express written consent. Shares in the Fund are not offered to persons or entities that are regarded as residents of South Africa under applicable taxation laws.

Share price

Share prices are calculated on a net asset value basis, which is calculated by dividing the value of the net assets of the Fund attributable to the shares by the number of shares in issue. The weekly price of the Fund is normally calculated each Friday based on the prices of the underlying investments prevailing at 5:30pm Bermuda time on the previous business day. Purchase requests must be received by the Registrar of the Fund (being Citi Hedge Fund Services Limited) by 5:00pm Bermuda time on that dealing day to receive that week's price. Redemption requests must be received by the Registrar of the Fund by 12 noon Bermuda time on that dealing day to receive that week's price.

Fees

A schedule of fees, charges and maximum commissions is available on request from Allan Gray International Proprietary Limited or the Registrar. Commission and incentives may be paid and if so, would be included in the overall costs.

Performance

Investments in Collective Investment Schemes are generally medium- to long-term investments. The value of shares may go down as well as up and past performance is not necessarily a guide to future performance. Performance figures are from Allan Gray International Proprietary Limited and are for lump sum investments with income distributions reinvested.
